

## EUROPEAN COMMISSION OF INQUIRY MEETS IN WEST GERMANY

WIESBADEN, BRD, May 3 (IPS) — Prominent academics and professionals will meet today in West Germany to form a European-wide Commission of Inquiry, announced the Executive of the European Labor Committees. Called by Professor Heinz, a member of the Philosophy faculty at Duesseldorf, the meeting will consider the working procedures that the commission will follow to investigate the brainwashing of ELC member Christopher White, the extent and danger of the widespread use of behavior modification in general and the specific use of it as a weapon in the Rockefeller conspiracy to overthrow existing governments in west Europe and North America. Plans will also be set out to establish ongoing liaison with the U.S.-based North American Commission of Inquiry.

The European Commission has received endorsements from such well-known individuals as Professor Beuys of the Kunstakademie, Duesseldorf and Lelio Basso from Italy. Commissioner Arno Kloenne, a professor in Bielefeld, demonstrated his commitment to the Commission work in a letter published in the German newsweekly *Der Spiegel*. Kloenne was responding to *Spiegel's* tongue-in-cheek account of the ELC April Conference:

"The report on the Labor Committees proves once more the limitations of bourgeois journalism: even critical information stays in the realm of the enjoyable. . . . It would be better to inform the reader of [the whole system which creates the CIA] than to titillate the readers with the report about the peripheries of the Labor Committees."

In order to operate in closer cooperation with the North American Commission, European Commission members will soon receive through the Executive of the ELC updated facts on the CIA covert operations in the U.S., centering on the Symbionese Liberation Army and Black Liberation Army, two CIA-created terrorist operations. With the information now available on the origins of European terrorists, the Commission can move immediately to publicize these Nuremburg crimes against the working class.

The North American Commission of Inquiry is convening in New York on June 8. At that time it will establish firm procedures to work continuously with the European Commission to put in motion a worldwide investigative and propaganda unit which will bring Rockefeller's crimes against humanity to the public and to trial.

## SPOOK TACTIC AGAINST NOLLAU; WEST GERMAN BND TRANSFERRED TO DEFENSE DEPARTMENT

WIESBADEN, BRD, May 31 (IPS) — The West German financial magazine *Capital* May 23 aired the charge that Nollau, head of the Bundesverfassungsschutz (BfV), West Germany's FBI, was actually an East German agent a la Guillaume.

The immediate object of these efforts to discredit Nollau, like Brandt before him (IPS Guillaume Grid, this issue), was revealed May 30 by the transfer of control over the BND from the Chancellery to the Defense Department, thus placing it officially under NATO. Previously the psychological destruction of Brandt which drove him from office was sufficient to introduce Rockefeller agent Helmut Schmidt into the leadership of West Germany.

The charge was shortly withdrawn for "lack of evidence." Major CIA-linked periodicals *Die Zeit*, *Frankfurter Allgemeine Zeitung*, and *Der Spiegel* have continued to call for Nollau's resignation in any case, on the basis that the charge, though untrue, was still *credible!*

Herbert Wehner, the last representative of the Brandt faction in the SPD leadership, counterattacked, stating May 26 that the Christian Democratic Union (CDU) and other reactionaries were using the spy hysteria to foment a "cold coup d'etat." CDU head Kohl responded: "Wehner has said and done quite a few wild things recently."

Wehner is partially correct. He fails to name, however, the only reactionaries with the operational capabilities to pull such a "cold" maneuver — the Central Intelligence Agency and its ally NATO.

## SPD: UNWANTED ELECTORAL SUPPORT . . .

WIESBADEN, May 31 (IPS) — An attack May 29 in the *Frankfurter Allgemeine Zeitung* (FAZ), organ of the right-wing Christian Democratic Union (CDU), highlights the growing effect of ELC intervention around the upcoming Lower Saxony elections into the previously confused and demoralized ranks of the West German Social Democratic Party (SPD). In an attempt to appeal to SPD chauvinism by portraying the ELC as "outsiders," the article, entitled "Unwanted Electoral Helpers," quotes SPD Landstag member Stief's attack on the ELC of ten days ago.

Stief, Press Secretary of the SPD, and the *Frankfurter Allgemeine Zeitung* attempt to portray the SPD as

having "to defend itself against unasked-for help in the election" from a "group of political sectarians with the name 'European Labour Committees.' "

The article quotes the paranoid Stief extensively on the subject of ELC organizing: "the organization has repeatedly disrupted the party's electoral rallies, even though they officially claim to support the SPD in the Lower Saxony election. With this emphasis members of the group have also 'chummed up to' every journalist

close to the SPD 'in order to get more publicity.' As for their claim that they work together with candidates of the SPD, not a word of it is true."

It is precisely through the intervention of the ELC that the masses of SPD rank and file members and lower bureaucrats know well that the real attack on the SPD and the German working class comes from Rockefeller colleague Helmut "Judas" Schmidt and his associates in the upper reaches of the party.

### LEADING COMMUNIST SPOKESMAN RESPONDS TO ELC

WIESBADEN, BRD, May 31 (IPS) — Chief economist of the East German Socialist Unity Party (SED) Kuzhinski has recently shown increased interest in European Labor Committee (ELC) proposals for an international united front around the need for Soviet-European economic cooperation in the implementation of the "golden snake" and brute force development of fusion power. Kuzhinski has been on a speaking tour of West Germany.

At a forum in Hannover where Kuzhinski was speaking May 23, the ELC intervened on the question of the

impending economic collapse. When members of the West German Communist Party (DKP) tried to interrupt the ELC speakers, Kuzhinski stopped them and said, "These people are serious; they are on our side."

At an ELC intervention at his talk in Frankfurt on May 29, Kuzhinski first responded to the ELC by saying, "When I was young, I sometimes thought I was right, but the Party was always proved correct." Later on, just before leaving the podium, he added, "I want to quote Kant: 'Sometimes questions are more significant than the answers,' " alluding to the questions raised by the ELC on the economic future of Europe and the role the Communist and Socialist parties must take in shaping it.

### UNEASY QUIET IN INDIA FOLLOWING BOMB TEST

May 31 (IPS) — The recent rail strike in India has ended with a spectacular victory for Indira Gandhi. Initially provoked into the strike by the government, the railworkers have now returned to work in a flush of nationalism precipitated by the country's first successful underground nuclear test. (Well timed, since India has had the necessary technology for several years.)

By skillfully playing upon nationalist ideology, Gandhi has wooed back her conservative congress. At the same time, her use of the nuclear tests has succeeded in completely containing the Indian Left, which has reacted in panic (IPS No. 4).

With the impending devastating famine this summer, this shaky stability is necessarily short-lived. IPS is analyzing Gandhi's political options, based on her recent capitulation to Rockefeller with her trip to CIA colony Iran, for an up-coming in-depth report on her support for Rockefeller's politics of mass starvation in India.

### THAILAND TENSE AWAITING ELECTIONS

May 31 (IPS) — Thai Premier Sanya Dharmasakti, head of Bangkok's unstable transitional regime, resigned May 22 in the midst of economic crisis and student demonstrations. He has subsequently been reinstated. Sanya was appointed Premier by the King in October, 1973 following CIA-inspired bloody student demonstrations. Attempts are underway to maintain the transitional regime until late this year when general elections are planned. Behind these precautions the military and police stand on alert. One potential key candidate to watch for is Dr. Puey (former head of the Bank of Thailand and economist at Rockefeller-funded Thummasat University) who, possibly running as a liberal, will try to implement the McNamara slave-labor World Bank game-plan in Thailand.
