

INTERNATIONAL BRIEFS

JAPAN'S STOCK MARKET PLUNGES

Oct. 8 (IPS)--Tokyo stock market prices hit a two-year low driven by fears of tight money and an economic slump. The president of the powerful Sumitomo Chemical Company complained that "Japan's rampant inflation is threatening her existence as a major industrial power, while the recession is reaching a very serious stage." Claiming that high energy prices made production costs prohibitive, he announced that "any further expansion will be outside of Japan."

To help Rockefeller's destruction of the Japanese economy along, the government approved 45 per cent increases in the price of natural gas.

ROCKEFELLER'S EXPERTS LAUD CHINA'S BACKWARD FARMING

Oct. 8 (IPS)--Rockefeller's food control experts toured the People's Republic of China this week led by Dr. Sterling Wortman of the Rockefeller Foundation. These agronomists gushed over China's labor-intensive method of agriculture. They claimed that backyard fertilizer plants and non-mechanized systems of crop rotation had produced large increases in food production. They especially praised the production team method of labor organization, whereby each family's income is determined by the success of the crop raised by the production team. Rocky's experts felt that this maximized incentive for hard work.

In fact, their reports of great progress in China's food production are a lie. The very labor-intensive methods which they praise and advocate for the rest of the world have resulted in a stagnation of food production. Rockefeller's implementation of such methods already is leading to starvation in India.

CIA HUNGER RIOTS IN INDIA

Oct. 8 (IPS)--In famine-stricken India, CIA agent J.P. Narayan is organizing hunger riots in an attempt to produce pure chaos and confusion. Faced with a Rocke-

feller-organized blockade of fertilizer and food aid, Indira Gandhi's central government completely has abandoned any attempt to deal with the problem. She is leaving millions of Indians to fend for themselves.

Narrayan is using this opportunity to bring down the government completely--without mentioning a word about Rockefeller's fertilizer cutoff. His efforts resulted yesterday in clashes with the police, leaving 12 persons dead.

SHEIKS PERFORM FOR ROCKY: MINES IN OIL FIELDS; GODD AT HOME

Oct. 8 (IPS)--To cover for Rockefeller's next Oil Hoax scheduled for the end of this year to cripple the world economy, the CIA's "hard-cop" Gulf States network of Kuwait, Iran, and Saudi Arabia escalated its phony "anti-imperialist, anti-American" act. This intensification was signalled by a report in the Oct. 4 Financial Times that Kuwait's armed forces have tightened security around the oil fields. They have also mined the areas around the oil installations to deter outside intervention, according to "informed travelers." Consultations are being held between Kuwait and Saudi Arabia, ostensibly because Saudi Arabia is "exposed" since "American techniques had worked out the entire Saudi military and security system."

In one of the more poignant CIA self-exposure tales, the travelers "added that rulers in the oil-rich states in the Gulf do not rule out the possibility of 'dirty tricks' by the U.S. CIA, such as attempts on their lives or plots to have them overthrown." Still more movingly, "the travelers said the sheiks may henceforth cut down on their travel abroad, and might resort to converting more of their petrodollars into gold and keep it at home."

SPD TRIES TO SQUASH LABOR COMMITTEE INFLUENCE

NEW YORK, Oct. 8 (IPS)--Today in West Germany the presidium of the Social Democratic Party (SPD) stated that at a Nov. 11 meeting of the SPD in Berlin, a policy would be put forward to outlaw "any and all" cooperation by SPD members with the "Communist-influenced" European Labor Committees and International Caucus of Labor Committees. Both the Sud-Deutsche Zeitung and the Hanoversche Allgemeine Zeitung ran lead stories today confirming that the SPD expected such a proposal to be passed, presumably at the presidium meeting. The SPD hereby makes public its recognition of the European Labor Committees as the only moving political force in Europe spearheading
