Get on the NAWAPA Bandwagon!

As the European press now trumpets openly, the global financial system is on its last legs, and there is a very real possibility that its hollow shell will not even be standing by Christmas. The bankruptcy of the British-run monetary system, centered on the Inter-Alpha Group, has run its course, and it is not at all clear that these predators can succeed in smashing the political obstacles to their gameplan of hyperinflation and Hitler-like austerity for the world.

The only option for patriots in the U.S., Ireland, and elsewhere, is to fight like hell for the only replacement system that will work: Glass-Steagall, a fixed-exchange-rate system, and the world's premier Great Project, NAWAPA. (To do that, of course, will require removing that sick man, Barack Obama, from the Presidency.)

Let's update the situation around NAWAPA, the North American Water and Power Alliance.

Two high-powered conferences held by LaRouchePAC, over the weekend of Dec. 4-5, demonstrate that the potential of the NAWAPA project for mobilizing the excitement, optimism, and political momentum required for its implementation, is reaching a new threshold. In both Pasadena, Calif. and Kennewick, Wash., LaRouchePAC organizers, members of the LPAC scientific Basement team, and experts from the wide variety of fields needed to build NAWAPA, came together to discuss the project.

At both conferences participants became involved in an intense dialogue about the physical challenges and benefits of the biggest biospheric engineering project ever conceived. They also discussed the fundamental scientific shift of outlook required, to be able to overcome decades of environmentalist and monetarist pessimism, to do what Americans used to be famous for: doing the impossible.

Many of the experts who spoke had been involved in in-depth discussions with the LPAC team over the past three months, and have become increasingly committed to realizing the NAWAPA project, which they would have thought but a dream only a few months before. Their testimony made it clear that it is absolutely feasible to quickly mobilize the millions of skilled engineers and construction workers, to launch a project that will address some of the most fundamental problems of mankind, starting with water, and extending to transport, power, and livable urban environments.

Playing a crucial role in building the momentum evident at the conferences has been LPAC-TV, which has featured several interviews a week on NAWAPA and its extensions around the globe, and has become an indispensable resource for the ideas necessary for this great project.

What's needed is for this idea to spread to the general population, now desperate for a vision (and mission) for getting out of the current slide into a New Dark Age. NAWAPA, as Lyndon LaRouche has emphasized, is the indispensable project for reversing this decline, and, as these conferences underline, has the potential for mobilizing the shift in culture, that can get it done. And LPAC is committed to do everything in its power to make that possible.

Undoubtedly, for most Americans, as well as the rest of the world, the situation is stark, and getting worse. But a political movement committed to fighting for the kind of future NAWAPA represents, has a power not measurable in money or numbers—it has the power of mobilizing the human imagination and determination to fight to victory. Join that fight, and what seems impossible, can be won.
