

The Science of Survival

Will mankind survive the multiple threats of extinction which now threaten it? The British oligarchy's threat of thermonuclear war, that same oligarchy's drive for global depopulation through economic cannibalism, and the ever-greater dangers presented by galactic changes—all can be defeated—but only by a radical shift in thinking by the leadership of nations, especially in the United States.

It is that shift of thinking which the LaRouchePAC scientific team, along with Lyndon LaRouche, is addressing in its weekly video reports. The first step, the team emphasizes, is to remove British puppet Obama from the Presidency. Then, the real work begins—as LaRouche summarized in the March 7 broadcast:

“We’ve come to the time, where the extinction of the human species is a possibility, it’s a very live possibility now, unless mankind can improve its behavior and being able to cope with some of these considerations; the extinction of the human species is a possibility, it’s even a likelihood. And therefore, it’s extremely important that we change our way of thinking, along these lines, to understand that the universe is not defined scientifically from the bottom up, but from the top down.

“In other words, mankind is not a product of something on a lower level of existence, but quite the contrary. The higher level of existence which is expressed *by* mankind, demonstrates itself to be a principle of the universe, and therefore, you have to judge everything from the standpoint of that view of the necessary evolution of mankind.

“Now, we’ve noted that in some of the work in the previous weeks here: The fact that the rate of increase of productivity, in which we’re going to a higher phase of productivity from a lower phase,

has been aborted. That mankind has slowed down the rate of its keeping up with the rate of deterioration with the circumstances of human life.

“So therefore, we have to say, first of all, you can not derive science *from the bottom up*: You can’t start with mathematics, you can not start with various kinds of gimmicks. You’ve got to start from the top; you have to say, “What is the universe?” What is the universe which created, or creates and incorporates these qualities which we recognize in the ability of mankind to create conditions that no other living form of life can do! That mankind *typifies*, in its expression, the nature of the universe. And typifies it, because it represents a power, which is the most powerful thing we know of in the universe! A principle of power, which we are beginning to understand, gradually, but which has always been there: That the universe is actually a creative process, run by a willful kind of process, which raises the level of the universe from a lower level to a higher level. And therefore, the attempt to adduce science from sense-perception, is the great idiocy which poisons the ability of the human species.

“We have to think in those terms: We no longer try to think in deductive, mathematical terms. Because in this [current] system, there is no principle. The deductive method in mathematics *does not lead us to any physical discoveries*. We use mathematics as a product of *sense-perception*, and are limited to the qualities of *sense-perception*. And sense-perception is the lowest form of life, in terms of thinking. Whereas the higher forms of life occur in the terms of creativity, and especially expressed in the specific quality of *human creativity*.”

Want to save mankind from extinction? LPAC’s Weekly Reports are a must-see.
