

## II. The Truth on Nord Stream Destruction

# German Government Must Act Immediately! Biden Had Nord Stream Pipelines Blown Up

by Helga Zepp-LaRouche

*The following statement was issued on February 8 from Berlin, as a press release for immediate international circulation by Helga Zepp-LaRouche, the founder and leader of the Schiller Institute and chairwoman of the German political party, the Civil Rights Movement Solidarity (BüSo).*

An [article](#) just published by the well-known U.S. investigative journalist Seymour Hersh, describes with meticulous accuracy how U.S. President Joe Biden had the gas pipelines Nord Stream 1 and 2 blown up in the Baltic Sea. This article should leave every normal person stunned in view of the complete lawlessness of the American government toward its “partners.” If the German government fails to act in the face of this utterly scandalous revelation, it will no longer have any justification to remain in office.

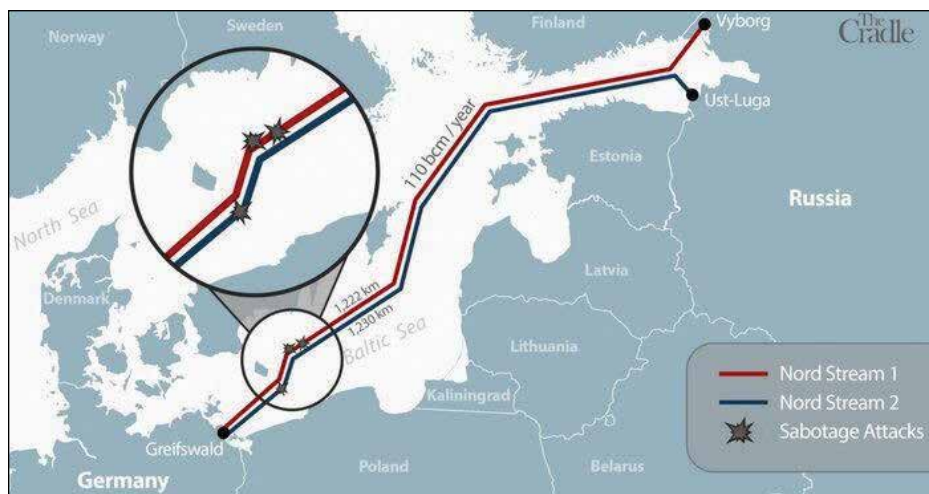

Seymour Hersh’s article, using both public and private sources, demonstrates that President Biden, through his National Security Advisor Jake Sullivan, had reviewed the proposed destruction of the pipelines as early as 2021 and later gave the green light for the operation. Also implicated were members of the U.S. Joint Chiefs of Staff, the CIA, the Departments of State and Treasury, and the governments of Norway and Denmark.

The explosives were placed in June 2022 during the BALTOPS 22 military exercise via a special diving team and were then detonated remotely by signal on September 26, 2022. Germany’s purchase of cheap natural gas from Russia had long been a thorn in the

side of the U.S. government, Hersh said.

This confirms the suspicion already circulating and at the same time adds minute details to it. Hersh demonstrates that the architects of this act of destruction knew it was an “act of war” and therefore demanded absolute secrecy.

In light of this monstrosity, Germany must act immediately! I demand that there be a full investigation into Seymour Hersh’s revelations in the Bundestag! At the same time, I call on the German government to

*The two Nord Stream pipeline routes under the Baltic Sea. The two pairs of pipe-lines were built to supply Europe with Russian natural gas. Three of the four pipe-lines were rendered inoperable with explosives at the points shown, on Sept. 26, 2022.*

IRNA

demand accountability from the U.S. government. The German government has a constitutional duty to prevent harm to the German people. The destruction of energy infrastructure strikes at the very foundation of our standard of living and economic stability.

The federal government cannot be indifferent to the fact that Germany and its people are the victims of the geopolitics of an obsessive war faction that not only accepts the destruction of its “allies,” but even a third world war and the potential extinction of humanity.
